

## CORE LIST OF PEDIATRICS BOOKS

Compiled by the Pediatric Library Special Interest Group  
of the Medical Library Association

This list was most recently updated in April 2009 by members of the Pediatric SIG. If you have comments or suggestions, feel free to contact Jessica Finnie, Childrens Hospital Boston [jessica.finnie@childrens.harvard.edu](mailto:jessica.finnie@childrens.harvard.edu). The list is intended to serve as a resource for anyone unfamiliar with the core pediatric literature and is just one selection tool in developing a pediatric collection. We have tried to follow many of the guidelines used in compiling the Brandon Hill List ([www.brandon-hill.com](http://www.brandon-hill.com)). Core journal titles are included on pages 26-28 of this list.

**Updates for 2009: This year a collective decision was made to exclude any out of print titles. The rationale is that this list is for titles that are of current (and not historical) importance. Also new for 2009 is the inclusion of pricing information and, when available, information about where to purchase an electronic copy of the resource. To browse this document by section, click on the Adobe PDF icon with a blue ribbon and a menu will appear.**

### Notations

- +** new title
- #** new edition
